# B. Sc. Artificial Intelligence and Machine Learning

# **Syllabus**

## **AFFILIATED COLLEGES**

### Program Code: \*\*\*

### 2020 – 2021 onwards

### **BHARATHIAR UNIVERSITY**

(A State University, Accredited with "A" Grade by NAAC, Ranked 13<sup>th</sup> among Indian Universities by MHRD-NIRF, World Ranking: Times -801-1000,Shanghai -901-1000, URAP - 982)

Coimbatore - 641 046, Tamil Nadu, India

Progran	nme Educational Objectives (PEOs)
	<b>c. Artificial Intelligence and Machine Learning</b> program describe accomplishments that s are expected to attain within five to seven years after graduation
PEO1	Expertized with the principles of Artificial Intelligence and problem solving, inference, perception, knowledge representation, and learning
PEO2	Exhibit high standards with regard to application of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models
PEO3	Investigate with a machine learning model for simulation and analysis and explore the scope, potential, limitations, and implications of intelligent systems.

Jan Contraction of the second second

Program	nme Specific Outcomes (PSOs)
	e successful completion of B.Sc. Artificial Intelligence and Machine gprogram the students are expected to
PSO1	Exhibit good domain knowledge and completes the assigned responsibilities
	effectively and efficiently in par with the expected quality standards for Artificial
	Intelligence and Machine Learning professional
PSO2	Apply the technical and critical thinking skills in the discipline of artificial
	intelligence and machine learning to find solutions for complex problems.
PSO3	Design and develop research-based solutions for complex problems in artificial
	intelligence and machine learning industry through appropriate consideration for the
	public health, safety, cultural, societal, and environmental concerns.
PSO4	Establish the ability to Listen, read, proficiently communicate and articulate complex
	ideas with respect to the needs and abilities of diverse audiences.
PSO5	Provide innovative ideas to instigate new business ventures in the hospitality industry

Program	nme Outcomes (POs)
On suce	cessful completion of the B.Sc. Artificial Intelligence and Machine Learning
PO1	Exhibit good domain knowledge and completes the assigned responsibilities
	effectively and efficiently in par with the expected quality standards.
PO2	Apply analytical and critical thinking to identify, formulate, analyze, and solve
	complex problems in order to reach authenticated conclusions
PO3	Design and develop research based solutions for complex problems with specified
	needs through appropriate consideration for the public health, safety, cultural, societal,
	and environmental concerns.
PO4	Establish the ability to Listen, read, proficiently communicate and articulate
	complex ideas with respect to the needs and abilities of diverse audiences.
PO5	Deliver innovative ideas to instigate new business ventures and possess the
	qualities of a good entrepreneur
PO6	Acquire the qualities of a <b>good leader and engage in efficient decision making.</b>
<b>PO7</b>	Graduates will be able to undertake any responsibility as an individual/member of
	multidisciplinary teams and have an understanding of team leadership
PO8	Function as socially responsible individual with ethical values and accountable to
	ethically validate any actions or decisions before proceeding and actively contribute to
	the societal concerns.
PO9	Identify and address own educational needs in a changing world in ways sufficient to
	maintain the competence and to allow them to contribute to the advancement of
	knowledge
PO10	Demonstrate knowledge and understanding of management principles and apply
	these to one own work to manage projects and in multidisciplinary environment.

Course Code		Applied Mathematics	L	Т	Р	C
Core/elective/Sup	oportive	Allied: 2	5	0	0	4
Pre - requis	ite	Basic Knowledge in Mathematics	•	labus sion		I
		Course Objectives				
To introduce the con-	cepts of Nu	mbers, Quantification, sets, logical reasoning, pr	obabi	ility a	nd	
calculus	1			•		
		Expected Course Outcomes				
1 Demonstrate probability a		pts of Numbers, Quantification, sets, logical	reas	soning	5,	K2
2 Apply the 1 domain	earned conc	cepts to solve various mathematical problems	relate	d to t	he	K3
3 Apply various problems	us laws rel	ated to logarithms and sets to solve various	math	ematio	cal	K4
4 Solve proble reasoning and		to permutation, combinations, mathematical	and	logio	cal	K5
· · · · · · · · · · · · · · · · · · ·		n <mark>ders</mark> tand K3 – apply K4 <mark>- Analyze K</mark> 5 – evalua	ate K	6- Cr	eate	
		A state of the sta				
UNIT I	Numbers	, Quantification and Numerical Applications			1	15
Antilogarithm - antilogarithm - I menstruation, seatin	Laws and p Numerical p		ns of	f loga	rithm I dist	and and tance,
		Algebra	1			$\frac{16}{1}$
diagram 4 - Relation Geometric progression Combinations - Perr with standard results	ons and type on - Relati mutations, C	- Venn diagram - De Morgan's laws - Proble es of relations - Introduction of Sequences, Ser ionship between AM and GM - Basic concept Circular Permutations, Permutations with restrict	ies - s of F	Aritl Permut	hmeti tation mbina	c and s and ations
UNIT III		Mathematical and Logical Reasoning				16
phrases in Mathemat sufficient) condition through variety of	tical stateme ", "implies' examples re	oning - Mathematically acceptable statements ent consolidating the understanding of "if and o ', "and/or", "implied by", "and", "or", "there elated to real life and Mathematics - Proble I man out, blood relation, syllogism etc).	only i exists	f (nec s" and	essar l thei	y and r use
UNIT IV		Functions			1	14
(Polynomial functio function; Modulus fu functions - Conce	on; Rational unction; Gre opt of limits process of fin	ons - Domain and Range of a function - I function; Composite function; Logarithm f eatest Integer function, Signum function - Graph and continuity of a function - Instantaneou nding derivative - Derivatives of algebraic func angents.	function nical n us rat	on; E repres es of	xpon entati chan	ential on of ge -

UNI	TV Probability	14
Probal	pility - Random experiment, sample space, events, mutually exclusive events - In	ndependent
and D	ependent Events - Law of Total Probability - Bayes' Theorem.

Course Code	Capstone Project Work	L	Т	Р	C			
Core/elective/Supportive	Skill Based Subject 2	0	0	4	3			
Pre - requisite       • Students should have a good understanding of software engineering       • Syllabus version         • Student should possess strong analytical skills       • Strong coding skills in any one programming paper       • Objectives								
	Course Objectives							
• To understand and se	lect the task based on their core skills.							
• To get the knowledge	about analytical skill for solving the selected task.							
• To get confidence for	implementing the task and solving the real time pr	oblen	18.					
	Expected Course Outcomes							
On the successful completion	n of the course, student will be able to:							
1 Illustrate a real world p	roblem and identify the list of project requirements	5			K3			
2 Judge the features of th	e project including forms, databases and reports				K5			
2 Design code to meet th	e input requirements and to achieve the required or	itput			K6			
3 Compose a project repo	ort incorporating the features of the project				K6			
K1 – Remember K2 –	Understand K3 – apply K4- Analyze K5 – evalu	ate K	6- Cı	eate				
	Aim of the project work							

1. The aim of the project work is to acquire practical knowledge on the implementation of the programming concepts studied.

2. Each student should carry out individually one project work and it may be a work using the software packages that they have learned or the implementation of concepts from the papers studied or implementation of any innovative idea focusing on application oriented concepts.

Contraction of the

3. The project work should be compulsorily done in the college only under the supervision of the department staff concerned.

# Viva Voce

1. Viva-Voce will be conducted at the end of the year by both Internal (Respective Guides) and

External Examiners, after duly verifying the Annexure Report available in the College, for a total of

75 marks at the last day of the practical session.

2. Out of 75 marks, 45 marks for project report and 30 Marks for Viva Voce.

Project Work Format
PROJECT WORK
TITLE OF THE DISSERTATION
Bonafide Work Done by
STUDENT NAME
REG. NO.
Dissertation submitted in partial fulfillment of the requirements for the award of <name degree="" of="" the=""> of Bharathiar University, Coimbatore-46.</name>
College Logo
Signature of the Guide Signature of the HOD Submitted for the Viva-Voce Examination held on
Internal Examiner Month – Year
CONTENTS Acknowledgement Contents Synopsis
1. Introduction
1.1 Organization Profile
1.2 System Specification
1.2.1 Hardware Configuration
1.2.2 Software Specification
2. System Study
2.1 Existing System
2.1.1 Drawbacks
2.2 Proposed System
2.2.1 Features
3. System Design and Development
3.1 File Design

- 3.2 Input Design
- 3.3 Output Design
- 3.4 Database Design
- 3.5 System Development
  - 3.5.1 Description of Modules (Detailed explanation about the project work)

# **4** Software Testing and Implementation

Conclusion

<b>Course Code</b>		<b>Capstone Project Work Phase II</b>	L	Т	Р	C			
Core/elective/S	upportive	Skill Based Subject : 4	0	0	6	3			
Pre - requ	iisite	<ul> <li>Students should have completed Capstone Project Work Phase – I</li> <li>Strong coding skills in any one programming paper</li> <li>Course Objectives</li> </ul>							
• To unders	tand and select	t the task based on their core skills.							
-	-	bout analytical skill for solving the selected task.							
• To get cor	nfidence for ir	nplementing the task and solving the real time pr	oblen	ns.					
		Expected Course Outcomes							
On the successful	completion o	f the course, student will be able to:							
1         Select appropriate input, output, form and table design									
2 Design code to meet the input requirements and to achieve the required output <b>F</b>									
3 Compose a project report incorporating the features of the project									
K1 – Remer	mber K2 – U	nderstand K3 – apply K4- Analyze K5 – evalu	ate k	.6- Cr	reate				
		Aim of the project work							
1. The aim of the	project work	is to acquire practical knowledge on the impleme	entatio	on of t	he				
programming con	cepts studied.	and and and and and							
		t individually one project work and it may be a v	vork i	ısino t	he				
		J.S.		-		1:			
		ve learned or the implementation of concepts from		paper	s stuc	nea			
or implementation	n of any innov	vative idea focusing on application oriented conce	epts.						
3. The project we	ork should be	compulsorily done in the college only under the	super	vision	of th	e			
department staff o	concerned.	SWIGHTE TO ELEVAND							
Viva Voce									
1 Vivo Voce wil	1 ha aandusta	l at the and of the year by both Internal (Despect	C.	ridae)	and				

1. Viva-Voce will be conducted at the end of the year by both Internal (Respective Guides) and

External Examiners, after duly verifying the Annexure Report available in the College, for a total of 75 marks at the last day of the practical session.

2. Out of 75 marks, 45 marks for project report and 30 Marks for Viva Voce.

**Project Work Format PROJECT WORK** TITLE OF THE DISSERTATION Bonafide Work Done by STUDENT NAME REG. NO.
